

RITA Meeting 2025

January 16-17, 2025

In this talk we intend to provide some updates after the last meeting (ATMA 2024, Lecce, June, 11-14, 2024).

1 We are aware of the following GNCS projects

- *To be announced*, responsible Maria Carmela De Bonis (Università della Basilicata).
- *To be announced*, responsible Clemente Cesarano (Università Telematica Internazionale Uninettuno).
- *To be announced*, responsible Francesco Dell'Accio (Università della Calabria)

1. F. Dell'Accio and M.C. De Bonis describe their projects.

2. It is pointed out how a researcher that does not enroll GNCS for a year cannot be a member of a GNCS project also for the next year. This situation is particularly a disadvantage for young researchers.

2 We have added the latest news to our homepage. Please let us know if something is missing.

We are aware of the following conferences in 2025:

- **Metodi e Modelli Analitici, Numerici e Probabilistici per Problemi di Fisica. In onore di Renato Spigler**, January 29, 2025, Rome, Italy.
- **SA2025: Software for Approximation**, 05-07 February, 2025, Torino, Italy.
- **Third SIMAI ANA&A Workshop**, May 2025, Salerno or Rome, Italy.
- **SIMAI ANA&A minisymposium**, September 2025, Trieste, Italy.
- **DRWAA25**, September 2025, Canazei (TN), Italy.
- **SMART2025**, September 28-October 2, 2025, Reggio Calabria, Italy.

Inform us about conferences having RITA members as organizers.

3.Next RITA meetings

- We remember that the next **RITA meeting** in presence will be organized by the group supervised by F. Dell'Accio (Cosenza), January 27-30, 2026.
- In view of this decision, we need to decide when to program a **Young Researchers Meeting**, that is usually organized in December or January.

4. New members

A) New RITA members.

- Gennaro Infante (University of Calabria).

Brief introduction by Gennaro Infante.

Marco Cantarini will be also a RITA member, as well as the Ph.D. student F. La Rosa, proposed by F. Dell'Accio and F. Di Tommaso.

B) Modification of Art.6 in [Statute and guidelines](#).

“L'affiliazione di ricercatori junior (dottorandi, assegnisti, posizioni pre-ruolo) avviene anche previa richiesta del responsabile scientifico membro di RITA al coordinamento RITA, che si esprimerà in merito alla richiesta.”.

This modification has been approved by the members.

5. Requests of new members and worldwide memberships

There are some issues with new members. In general they are members of italian institutions and remain in italian institutions, but it can happen that

- they are members of italian institutions that later go abroad (temporarily or definitively);
- they are italian citizens that are not presented by RITA members, but are members of foreign institutions and ask RITA membership.

Next many foreign collaborators participate to our meetings, without being RITA members.

We would like to open them some kind of membership also allowing to their scholars to join our meetings for young researchers.

A solution could be the constitution of **RITA abroad** that gathers all these reseachers, provide them useful information but exclude them from discussions and polls.

We would like to have opinion from the members.

5. Requests of new members and worldwide memberships

The previous points have been discussed by the members.

- RITA has already some regulation for italian researchers abroad and some ideas for not italian investigators.
- RITA has to keep in mind that Young Researchers' meetings were introduced to give the opportunity to young members to have talks in a friendly environment.
- It seems possible to introduce **RITA Friends** for new not italian RITA members that somehow want to take part to RITA. The coordinators will think how to implement this project.

We need to decide who will be the next coordinators.

The researchers

- Laura Angeloni,
- Rosanna Campagna,
- Roberto Cavoretto,

have been coordinators for two years.

Alberto Viscardi ends his work as RITA webmaster.

We thank them for all the valuable help that they provided during these years!

New RITA coordinators will be

The researchers

- Incoronata Notarangelo,
- Vita Leonessa,
- Filomena Di Tommaso,

will be in the staff of RITA coordinators.

Federico Nudo will begin his work as RITA webmaster.

We thank them all for their future efforts and ideas!
