The “Percorso Formativo Comune” is a joint project between SISSA and the University of Trieste, aiming at offering an excellence MSc program in Mathematics. Organized more than ten years after its inception, this meeting has a double purpose. On the one hand, it is an opportunity to reflect on the results of the program, also on the basis of research talks given by some former fellows. On the other hand, round tables will offer to young students some perspectives on possible careers as professional mathematicians after their BSc.
