Statistical convergence in topology

Giuseppe Di Maio

Seconda Università di Napoli
Via Antonio Vivaldi, 43, Caserta, Italy
giuseppe.dimaio@unina2.it

It is a joint work with L. Kocinac. We investigate statistical convergence of sequences in topological spaces in connection with selection principles.

2000 Mathematics Subject Classification. Primary 54A20; Secondary 40A05, 40A99, 26A03, 11B05.

Keywords. Asymptotic density, statistical convergence, statistical limit point, statistical cluster point, selection principles, game theory.
